

KAARINAN TRIMET OY

THIN SHEET METAL  
SPECIALIST

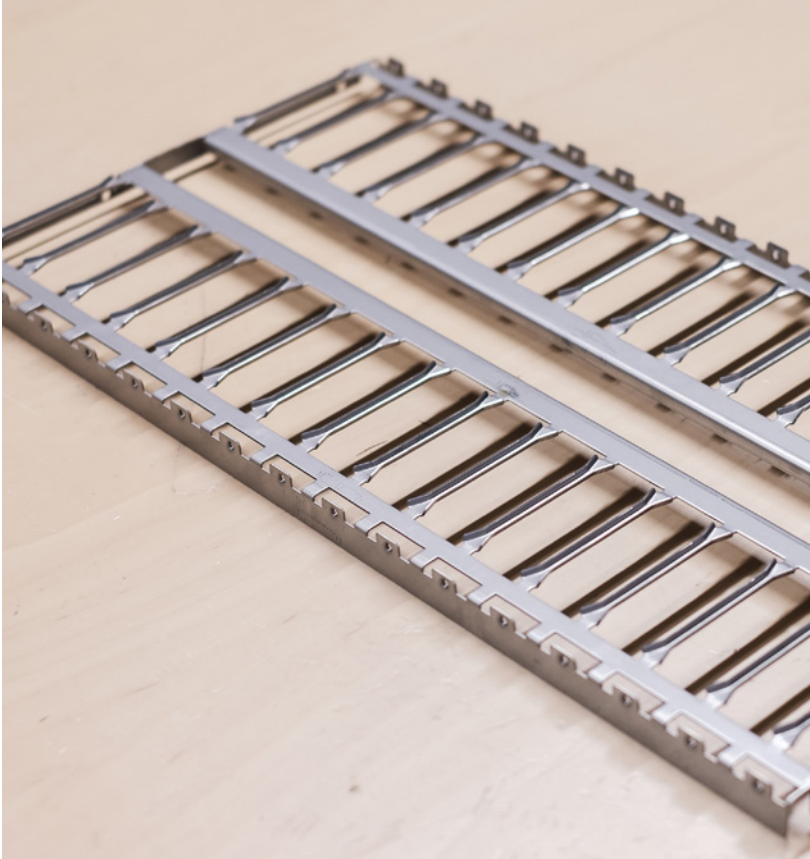

# Thin sheet metal for industrial needs

Kaarinan Trimet Oy is a company, founded in 1986, specialising in demanding thin sheet metal production. Our clientele includes leading machinery and appliance manufacturers in both the domestic and export market. Our products are used in medical equipment, the electricity and electronics industry as well as in ships, trains and the mining industry. Quality production is guaranteed by our knowledgeable and committed staff and our modern production technology as well as our efficient production control

system, which allows the tracking of products from the factory to the customer.

We produce parts from both our own and our clients' materials. When needed, we aid the client in designing the part and produce the prototype. For the deliveries of components, demanding machining parts and surface finishing, we use reliable and quality subcontractors.

# Quality and the environment at the forefront

Our strengths are flexibility, reliability and the constant development of our operations, which is maintained with sufficient human and financial resources. We follow production control by marking each work phase with a barcode.

Environmental awareness is also a central value in our operations. We strive to improve our environmental performance by minimising our emissions and training our staff to recognise the environmental effects of their work and to follow environmental guidelines. We also announce our objectives and environmental performance boosting achievements.

**Our operations fulfill the stipulations of the ISO 9001:2015 quality system and the 14001:2015 environmental system.**

**The GoZee app makes the brochure come alive**

**GoZee: Get started in 30 seconds**

1. Go to App Store or Google Play, enter "GoZee" in the search field and download the app to your smartphone or tablet.
2. Open the app and use it on pages with the GoZee icon.

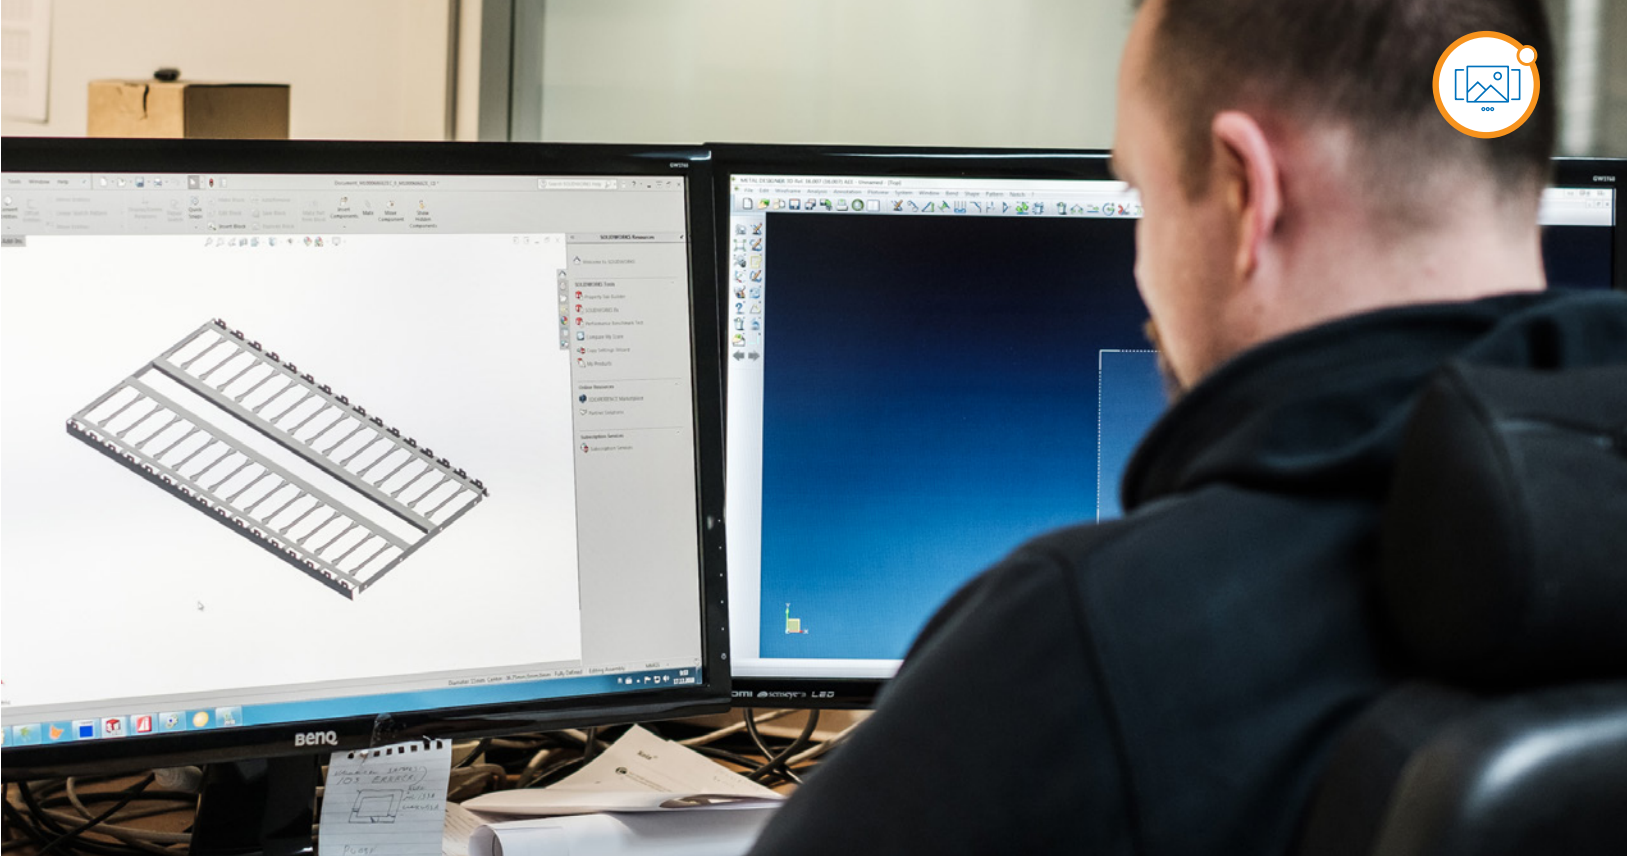

**SERVOKÄYTTÖISET SÄRMÄYSPURISTIMET. SUOMESTA.**

# From planning to production

Kaarinan Trimet Oy's services include both product design, programming and production.

We manufacture our products utilising 3D-modelling as files or paper images. We have the industry's best equipment at our disposal, with which we manufacture high-quality products precisely according to measurements, efficiently and economically. We also provide laser welding, which allows us to produce and assemble demanding welding products. Our meticulously selected partners are responsible for machining, turning, painting, chemical surface finishing and laser marking.

## MAALAUSTUOTE PASI

- POWDER COATING
- CHROME PLATING OF ALUMINIUM
- FROM SMALL UNITS TO BIGGER SERIES

# First class machines

We make sure that our production equipment is modern and is able to respond to the changing needs of the industry. With high-class equipment we guarantee the best possible products. We have a combination machine at our disposal, with which we perform laser cutting, threads and drag holes, roll-shaped braces as well as earthing symbols.

The materials we use are stainless, acid-proof, electroplated, hot-dip galvanised and aluminum galvanised steel, spring steel, black iron, aluminum, copper, brass and plastics.

## OUR PRODUCTION EQUIPMENT:

- **AMADA ENSIS 3015 AJ -fiber laser cutter 2kW**
- **AMADA ENSIS 3015 AJ -fiber laser cutter 9kW + warehouse machine**
- **TRUMPF TruLaser 5030 -laser**
- **TRUMPF TruMatic 7000 -combination machine**
- **TRUMPF TruLaser Robot 5020 -laser welding cell**
- **AMADA EMZ M2 and Yaskawa -punching machines**
- **press brakes 7 pcs.**

## JOLLMAX Coating Oy

Powder coating, wet painting, tampo- and silk screen printing, laser engraving/ -marking and other services with 30 years of experience.
